PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in full-stack development, primarily focused on back-end engineering. Proficient in Spring Boot/Java, Python/Flask, and C++ with strong foundation in data structures and algorithms. Currently automating accounting cycles through ERP and banking API integrations, designing RESTful APIs, and architecting database schemas. Achieved top 3% ranking on LeetCode.

SKILLS

Programming Languages: C++, Python, Java, PHP, JavaScript

Frameworks: Spring Boot, Flask, Laravel, Node.js

Databases: PostgreSQL, MySQL, MongoDB

Tools & Technologies: Git, GitHub, Docker, RabbitMQ, RESTful APIs, Microservices Architecture

Core Competencies: Data Structures, Algorithms, Object-Oriented Programming (OOP), Design Patterns

Operating Systems: Linux, Windows

EXPERIENCE

Back-End Engineer @ Settle

Sep 2023 - Present

- Developed and maintained a microservices-based peer-to-peer payment system, enabling clients to pay customers with a single click
- Designed and implemented RESTful APIs using Flask/Python for seamless data processing and system integration
- Conducted code reviews and implemented performance optimizations, improving system response time and code maintainability
- Technologies:** Python (Flask), JavaScript (Node.js), PostgreSQL, RabbitMQ, Docker, Microservices Architecture

Session Lead – Fundamentals of Programming @ Udacity | Part time

Oct 2024 - Oct 2025

- Led interactive programming sessions covering data types, control structures, functions, and object-oriented programming
- Guided students through hands-on coding exercises and projects, achieving high student satisfaction ratings
- Reviewed code submissions and provided constructive feedback to reinforce clean coding practices and problem-solving techniques

Back-End Engineer @ Eden Technologies

Dec 2022 - Sep 2023

- Developed and maintained a car parking management system deployed across smart villages in Saudi Arabia
- Designed back-end services and database architecture to handle parking transactions and real-time monitoring
- Implemented dynamic pricing and real-time occupancy updates to enhance system functionality and user experience
- Technologies:** Java (Spring Boot), JavaScript (Node.js), PostgreSQL, MongoDB, RabbitMQ

Front-End Engineer @ Egyptian Armed Forces (National Service)

Nov 2021 - Dec 2022

- Developed and maintained front-end modules for a comprehensive ERP system focusing on scalability and usability
- Collaborated with back-end teams to integrate APIs and reduce data synchronization errors
- Technologies:** React, JavaScript

Full-Stack Engineer @ NajahNow | Part time

Jun 2020 - Mar 2021

- Developed an online educational platform that provided critical remote learning solutions during the COVID-19 pandemic
- Built full-stack features including secure authentication, course management, and student dashboards
- Launched payment gateway integration and real-time quizzes to enhance student engagement and learning experience
- Technologies:** PHP/Laravel, Blade Templates, JavaScript, HTML, CSS, MySQL

ACHIEVEMENTS

- Passed **Google Software Engineer L3** advanced interview process (2026)
- Achieved **top 3%** ranking on **LeetCode**, a leading competitive programming platform with over 20 million users worldwide
- Graduated with **Very Good** overall grade and **Excellent** graduation project grade from Cairo University

EDUCATION

Bachelor of Engineering, Software Engineering, Cairo University

Sep 2016 - Jul 2021
